

Priceless Quotations

- ∞ “From the *Root* to *Crown Center* that supreme conscious tune is ever present, perpetual within every molecule and particle. All our sensory organs are immersed in their meditation within that captivating, eternal, universal tune.”
- ∞ “The moment we will realize the supreme sensitive presence of that Cosmic tune in our senses, we will get to know which place we do belong and the primary purpose of our existence.”
- ∞ “The embodiment of this universe is actually the expression of the Cosmic Void. Everything has been engraved within this vacuum. One can never describe the Superconsciousness of this Great Void.”
- ∞ “This Void and Emptiness is represented through the act of creation of consciousness and it is manifested within every being and present in every matter as ‘non-identifiable entity’, thus existing within every entity as ‘non-discoverable self’. This is the biggest mystery in the creation.”
- ∞ “In every situation our unconsciousness resides in the realm of that Great Void of Cosmic Space. Meditation is needed to escort this consciousness to our real senses. Therefore, the concept of meditating on the Void has been propounded”
- ∞ “The Space is empty, and creations are drawn on it. The process of sketching in vast Emptiness is happening continuously. The Void and creations both are eternal and conscious.”
- ∞ “The day our ‘body vessel’ becomes fully aware, we will realize that all creations are from the Void and the Void is from the creation. We are the traveler of the Void path, playing the body-harp for eternal tuning through the chanting of the Holy name”.

Atoms and molecules in the universe neither increase nor decrease. New books and literatures are created using the same twenty-six alphabets, which never vary in number no matter how many new books are composed. Similarly in the universe too, existing atoms and molecules are finite in number. Combination of these by permutation and combination gives rise to various shapes and forms in the universe.
