

## **Infinite Void**

In this world of emptiness, everyone is living in the Void Space. This primordial endless space is the root of everything. Space is driving the brilliant natural laws which have created this visible world; these laws govern everything in the universe since time immemorial. Under the shelter of this Void all living beings are connected to each other. Therefore, the state of the Void is the state of unfound, the state of uncertainty, everyone is realizing that every moment of life. Amidst every object and every sense, there lies the tune and response of the Void. Whoever is seeing, listening and talking cannot be detected. The state of not-being founded is the form of The Void, the identity of the Creator. One cannot find the Creator separately, but His presence and response can be felt through every substance and matter. Who is at the root, that very Primordial One is like the Government. From the security to the President, together they represent the Government. But we cannot uniquely identify who the Government is. Similarly, that very Ancient One, though He remains within everything, everywhere, cannot be pinpointed.

As everything of the living world has evolved from the Void, nothing can be traced back uniquely. The small stomach does not remain filled, though we eat so regularly. No thirst is getting quenched, nor is any desire being satisfied. Similarly, after death where do the living beings disappear, where do they transcend; that cannot be detected. There is an influence of Void in everything, what does it indicate? It is indicating that we all are under the shelter of the Void. The state of nothingness is therefore our normal state. If we were not eternally connected with the Void, there would not have been any effect of this Void on our body. We all have emerged from The Great Void, and we all are moving ahead like a traveler attempting to unify with the Void while we remain defined with the form sourced from that Void. That is why everything that we create disappears into emptiness, and no limit is observed in whatever is emanating from Him. Though we are in a state of constant search, everyone remains in the state of untraceability – we remain in the state of vanishing. This is the state of subtlety, the state of trance-conceptuality and worship. It indicates how great our power is. It is happening so naturally that we cannot affix a value to it. Whenever we feel any object, it would be understood that those objects are conscious. Those objects are conscious, that is why we can feel them. When we realize that we have come from the Void, then it can be inferred that the Void is also conscious. As the Void is manifested as superconscious that is why innumerable forms are created from the Void. In the realm of Nature, The Supreme

One, on whom we depend, under whose aegis the living world takes refuge – the wind, light, and water – all are made from the Void. All the expressions of life have come from the Void and exist within this Void as sketches.

The shapeless state of Space can be understood by looking at the Sky. The Sky exists forever in the state of Void. Wherever we look, there is only the blue Sky, there is no limit anywhere. This state of emptiness is the form of the Sky. It has no form of its own, no shape, and has no definition. This is a strange form. Yet from this shapeless form an infinite number of stars, planets are formed, enumerable living beings have been created. This nothingness within the existence, and the existence within the nothingness is the true representation of the empty Sky. In general, the Sky has no shape, no definition, no start, no end, no form, no colour and is completely empty. Again, whatever we see, everything is the form of the Sky, it is the description of the Sky. Everything comes from the Sky. The infinite forms of creation are also the form of the Sky. That is why all the colours disappear amidst the vastness of the Sky, every thought fades into the great wisdom of the Sky, every soul or consciousness dissolves to the superconsciousness of the Sky. That is why within every matter, within every creation, within every sense, the influence of the Void is always there. In every atomic particle of our body, every limb imbibes the great consciousness of the Void Space that is why everything in our life remains under the influence of the Void. The description of the Sky is depicted everywhere and so nothing can be uniquely identified. We are made up of that boundless matter of the Sky. That is why there is no limit to our knowledge, realization, or consciousness. One that has no limit, is the form of the Sky, form of the Void, and so transcribers have described it as the Almighty. We are all residing within that Supreme having enormous potential. Thus, we need not do anything. We need to comprehend that we all are tuned within the Sky and thus existing in a state of superconsciousness of that Void. This is the realization of philosophy. The theology of Space is the only philosophy to realize, through which every other philosophy can be understood. The eternal Space that exists within everything within the universe with its superconsciousness, is the subject of our meditation.

Our mind is as enormous and vast as the Sky and is always in a state of emptiness with the thoughts of the Sky. Mind is the Sky and Sky is the mind. The mind is as infinite as the Sky. The state of the mind is the same as that of the Sky. Mind is always awake with its own being, yet it cannot be found anywhere within the body. From the mind, blood, semen, flesh,

bone marrow are formed. Knowledge, intellect, and judgements originate from the mind. We will undermine the power of our mind if we bring wisdom, intellect, or consciousness to describe the mind. In a state of emptiness, our mind always becomes vast like Sky. This state of mind is the absolute, blissful trans-conceptual state. This state was there forever, will also be there forever. This is called Yoga. We are all connected through our mind, all are tuned to the same melody. We need to realize that we are connected. This is the state of enlightenment. This is real philosophy.

We all remain in a state comparable to the unboundedness of the Sky, vastness of the mind and to that of the superconscious Void or Emptiness. So, if we are engrossed in thoughts of the Great Void, our thoughts will flow in the same direction as that state which is already there in the void

space of the Sky. So, our duty is to meditate on the thoughts of The Void. Under normal circumstances our thought process always speaks about the Void following the law of Nature and there is influence of the Void in everything. We are infused with the superconsciousness of The Great Void and marching forward to unify with that super consciousness. Our intelligence is progressing under these conditions. If we can immerse ourselves with the thought of Cosmic Void and get united with the Great Void, then only we can be attuned to the same level. This is called liberation. In other words, we all are in the same state as that of The Great Void. But it resides in the form of seed. With spiritual practice and meditation on the Void, it has to be sprouted, and decorated with flowers and fruits. Therefore, The Void should be our only focus<sup>13</sup>.
