

Flight of a Soul

When we are caught by the beauty of the Transcendence, and when our souls are startled, the flight to the realm of Infinite Beauty or the Ultimate God is an absolute inevitability. The more we have been able to experience the divine spirit from theories of reality, the more our souls embark upon the flight of the soul. It is like a journey from the beauty of the natural world to the transcendental divine. Nature is immensely beautiful because it manifests as a small fragment of the beauty of Infinite Divinity. The flight of the soul refers to the rise of the soul from the beauty of the physical world to a perception beyond the narrow confines of gross materialism. This knowledge will enable us to do what numerous pages of the highest holy scriptures could not. The flight of the soul helps us embark on an unprecedented and tremendous ascending spiritual journey. Beyond the realm of a normal state of awareness, every flight of the soul aims to stir and startle our soul as a deep response of the creature to creation.
