

Everlasting Void

Life emerges from “*Mahakash*” (Space) and everyone is under the shelter of The Great Void. Some know it, and some don't. No one is there anywhere beyond this Void. Everyone is taking refuge within the Void, no matter how many feats he displays. Nobody is there beyond the Void. Everything is running around this Void. We are also moving like Sputnik within the Void. No thought, no path, no philosophy exists beyond the Void. The tricks one may exhibit or feats one may have, to whatever extent are all bounded within the world. There is nothing beyond that. We all are floating in the Space. Nothing is there beyond Void. As the moon, the sun, the planets, the stars, exist in universal Void, we too as travelers on that sacred path are floating in the bosom of Space, progressing at our own tune and pace towards the limitless, on the way to eternity. There are no hindrances and barriers on the path. Everything is full of transparency, full of expansiveness and full of harmony. There is no philosophy or feeling but only Nothingness. This Nothingness is everywhere in our life. There is nothing, but only the expanse of Void. There are surprises one after another. We are moving past millions of stars, planets on our path to eternity. Nowhere is there to rest, no desire to see or feel. There is only to proceed and move ahead. Leveraging the motion of space, it feels good to follow that movement of space at the speed of Sputnik. Then, Nature creates a state of body and mind in its own way such that any complex thing can be easily solved.

We are living in the shelter of the Void; how can we forget it? The Void is the destination of our journey or motion. When we follow the track of The Great Void, every part of the body, every gland gets energized and is aligned with the speed of the Space. For that the body parts that help to know, sense and conceptualize become so energetic that every complex problem of the visible world appears to be easy and simple. As a result, we get inspiration to increase the speed of movement. All the ideas, paths and trends of the eternal Space are exhibited within every substance of this world. Hence, we get the path to progress with the help of the trends from the Space exhibited in the world. This world is the notes and notation of the Space. All the ideas, opinions, paths that are in Space are also exhibited in this world. This description and flow are wonderful. There is no end to it. Any object in Space is not without reality. And here, there is no such thing as imagination. All of us in this living world have become travelers within The Great Void. Everyone is roaming around in space. One who understands it easily, may also progress easily towards the goal. It will be easier for him to

travel towards eternity. One who is in complexity, has been lost in entanglement with worldly matters.

We all should practice meditation of that Nothingness, gain wisdom of that Nothingness and foster love for that Nothingness. Here, there is no sanctitude, and there is no deity. It is not necessary to confirm or reject the presence or absence of any deity. Again, there is no need to swing in confusion between the presence and absence of God. In between this confusion, there exists only the Void. There is nothing except the Void. We reside in the Void and fuse into the Void. In one word it is the surrender of our mind to that eternal Void¹².
