

Transcendent Void

The sun, the moon, the planets, and the stars remain connected to each other and evolve as they progress. Where is the origin of this evolution? Where is that primordial power from which everything is emerging from time immemorial? If there is one, there must be another. Therefore, if we search the origin in this way, we have to go to innumerable matters, yet there will be no solution. This way we will never be able to find the origin of the creation. All living beings originated from the Earth, Earth has come from the Sun. Further, the Sun has come from another matter. This way none is in its indigenous state. To find the origin of the living beings one ends up on Earth, similarly, to find the origin of Earth we end up on the Sun. Thus, innumerable atoms floating in the eternal Space undergo this churning process and bring forth the *Earthly plane, Sky Plane, Heaven, Great Plane, World of Life, Plane of Austerity, Realm of Truth* along with numerous planes in a similar way. When everything merges into one and the whole Universe is named as one unique object, still the question persists where that unique matter came. The existence of it is no longer found. If this existence is not there, then how do we progress as it seems to manifest again and again. It remains unnoticed amidst the searching process; it cannot be traced out. That is why the origin of the Creator is inconspicuous – HE is unimaginable and transcendent. However, it fails if the remnants of the past persist. The spiritual practice is to reveal that unknown to become enlightened. If we search for the materiality of the object with our limited thoughts, we will get nothing at the end, everything is being only called by name. With repeated searching, everything at the end diffuses into the eternal Cosmos. This Void or Emptiness is the only original. From this Void everything emerges out. That is why there is the influence of the Void in everything. Thus, who listens, who sees, cannot be pointed out. Everything ultimately unites with the Void. To let everything be united with the Void is the real spiritual practice. The sun and moon, stars and planets are all immersed in the meditation of The Great Void. We also need to meditate upon the Void, because the living world is taking shelter in the Void and is moving forward with the influence of Void. If we are immersed in meditation with the thought of the Void, then within us the melody of fulfillment and the eternal tune will be awakened within. There is no need for seeking liberation. The living beings are naturally pure and free, they are ever awake. Everyone comes here liberated from the free-state and will be merged there again. Our only duty is to be engrossed with the thought of the Void. When we are immersed in the thought of The Great Void, our expression

gets bolstered, then the tune of that living being will be at the same level as that of the eternal tuning of The Cosmic Void . The living beings then understand that their tuning and the eternal tuning of the superconscious Void are in the same state. All the pursuit is for this realization to come true. When this realization is perfectly reflected, then the living being becomes awakened and tuned. The eternal power of the universe will then become the power of the living being and all the mysteries of the world will be revealed that day. On that day, true enlightenment will come from spiritual practices. Living creatures will realize that its form is the form of the sun and the form of the air. “*Anima* – process of becoming small”, “*Laghima*- process of feeling light”, “*Antaryamityo*” – power of mind reading and “*Sarbobhyaptomanota*” – the power of being omnipresent, all the divine processes will come under their control on that day. Everyone is travelling towards this path. For this reason, the living world is created. This can be achieved through the meditation of the Void. All the supernatural power will come under our control if we immerse ourselves in the deep meditation of The Great Void. We will then rightly realize our omni-presence all over the universe. For that reason, only spiritual practice is required¹⁰.
