

Vast Void

In the odyssey of life, we are all unified with the Great Void, we all remain with the same perpetual existence of the Cosmos, and we are within that great power of The Supreme, Eternal Being. Still our mind always remains tempestuous, full of enthusiasm, just to realize our authentic quintessential, astounding form of the boundless universe. Since the massive ocean, breeze and all the planets, sub-planets are rapidly surging up with the primary purpose behind this creation, similarly the mind is also churning itself to get amalgamated with that Ultimate Consciousness to distinguish its real self. This disconcerting restlessness of mind is to restore that original melody.

The mind is vastly expanding within the Great Void with its everlasting motion and meditating with that mind the Primordial energy must be comprehended. The energy that is innate in everyone in the dormant form of seeds needs to be conjured. This can be achieved effortlessly with the meditation of the Void. Anyone intently engrossed in that conscious 'self', with absolute raptness of that Great Void, can emanate that greatest pristine tune of that Supreme One. If we propel the vast mind, which is ever expanding within the universal Space to that eternal endless Sky then the spontaneous inner spirit of every entity will be awakened. The quintessential force through meditation on that Supreme Emptiness keeps us attuned to that absolute establishment of the vast firmament. When our mind is enticed in the mediation of that Absolute Void, it tries to lead every atom, molecule of this universe under its supremacy to get united with every other thing in the mind. The great force of our mind reveals and manifests with utmost luminosity within the thought of that Great Void. Naturally then the intense potency of subtlety, lightness and all pervading senses of the omniscient gets manifested¹⁵.
